

## For Buildings

### Energy Storage Solutions

Energy Storage Solutions is an incentive program designed to help Eversource and UI customers install battery energy storage for their commercial, industrial, and institutional properties. Installing a battery for your business, nonprofit, or government facility can help you lower your building's peak demand to reduce energy costs. Batteries can also provide backup power when the electricity goes out to keep your lights on and your facility running without interruption. Performance-based incentives are available to reduce the cost of an energy storage system. **Additional value may be available for customers on the grid edge, critical facilities, facilities replacing fossil fuel generators, and small businesses.**

### Energy Storage Solutions Benefits

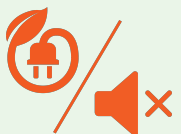

**Affordable:** With Energy Storage Solutions, there has never been a better business case for purchasing a battery. Performance-based incentives allow you to earn money by participating in Active Dispatch events over the ten-year enrollment term. Enrollment Incentives are available for certain Priority Customers, providing even greater savings to businesses and nonprofits who need it most. Visit [www.energystoragect.com](http://www.energystoragect.com) for details.

**Resilient:** With batteries, you're protected from power flickers and outages. Keep things running no matter the weather so you can focus on serving your customers, employees, and community.

**Cleaner & Quieter:** Unlike generators that run on fossil fuels, batteries are a clean, quiet option for powering your business during an outage and managing your daily power demand. Battery systems paired with solar PV systems can charge during an outage and help your business run on solar energy around the clock.

## How Do I Get Started?

Talk to an Eligible Contractor who will help you size and identify the best location for your battery system based on your facility's needs or the core function of your business. Your contractor will help you decide on a battery size that works for the goals of your facility.

### Commercial and Industrial Customer Enrollment Incentive Rate Schedule

Customer Type	Enrollment Incentive
Standard Commercial	N/A
Priority Commercial	\$10/kWh

### Commercial and Industrial Customer Performance Incentive Rate Schedule

Customer Category	Annual Peak Demand	Years 1-5	Years 6-10
Small or Medium C&I	Less than 500 kW	\$325/kW	\$175/kW
Large C&I	500 kW or greater	\$275/kW	\$175/kW
