

For Buildings

Energy Storage Solutions

Energy Storage Solutions is an incentive program designed to help Eversource and United Illuminating customers install battery energy storage for their commercial, industrial and institutional properties. Installing a battery for your business, nonprofit or government facility can help you lower your building's peak demand to reduce energy costs. Batteries can also provide backup power when the electricity goes out to keep your lights on and your facility running without interruption. Upfront and performance-based incentives* are available to reduce the cost of an energy storage system. **Additional value* may be available for customers on the grid edge, critical facilities, facilities replacing fossil fuel generators, and small businesses.**

Energy Storage Solutions Benefits

Affordable: With Energy Storage Solutions, there has never been a better business case for purchasing a battery. Upfront and performance-based incentives* allow you to save money at the time of purchase and earn over the life of your system. You could receive up to 50% off the installation price with additional performance incentive payments based on the average power your battery contributes during critical periods.

Resilient: With batteries, you're always ready for a storm. Keep your business or facility running so that you can continue to serve the needs of your customers or staff.

Cleaner & Quieter: Unlike generators that run on fossil fuels, batteries are a cleaner, quieter option for powering your business during an outage. They're better for the environment and friendlier for your customers, staff, or members. Battery systems tied to new or existing solar PV systems can charge during an outage.

*The current incentive structure is set to expire on April 1, 2026. It will be replaced with a comparable, simplified design. Visit energystorageCT.com for more information.

How Do I Get Started?

Talk to an Eligible Contractor who will help you size and identify the best location for your battery system based on your facility's needs or the core function of your business. Your contractor will help you decide on a battery size that works for the goals of your facility.

Commercial and Industrial Customer Upfront Declining Incentive Block Structure*

Tranche 3 Enrolled Capacity	Tiered Upfront Incentive (\$/kWh)			Priority Customer Adder
	Small Commercial (\$/kWh)	Medium Commercial (\$/kWh)	Large Commercial (\$/kWh)	
0 to 50 MW	\$182.00	\$159.25	\$91.00	+25%
50-75 MW	\$164.00	\$143.50	\$82.00	+25%
75-126.1 MW	\$146.00	\$127.75	\$73.00	+25%

Commercial and Industrial Customer Annual Performance-Based Incentive*

Season Incentive (\$/kW)	Years 1-5		Years 6-10	
	Summer	Winter	Summer	Winter
	\$200	\$25	\$115	\$15

*The current incentive structure is set to expire on April 1, 2026. It will be replaced with a comparable, simplified design. Visit energystorageCT.com for more information.
